Presents

2020 **Practical Pearls** Workshop Series

Our September Theme: "Tricky Topics"

In the areas of

- **Adolescent Medicine**
 - Pelvic Health
- Children with Intellectual and **Developmental Disabilities**
- Complex Special Health Care Needs
- And What Families Want You to Know and How to Talk with Families on Difficult Subjects

2020 PediatricPractical Pearls

Saturday, September 12, 2020 7:45 am to 12:00 pm

"Tricky Topics"

Course Description

Designed for pediatricians, family practice physicians and others providing primary healthcare to children. This course will review current scientific advances as they apply to daily practice. Participants will advance their diagnostic and therapeutic skills through this practical evidence based review.

Course Objectives

At the conclusion of this course, participants should improve their knowledge in current diagnosis and treatment guidelines and should be able to:

- Diagnose and initiate treatment for adolescents with polycystic ovary syndrome.
- Review Explain the role of the musculoskeletal system in regard to voiding dysfunction, define the role a pelvic health physical therapist can perform, and list the appropriate criteria for referral. Participants will also be able to expound on the roles other medical professionals can provide and stipulate the appropriate first line recommendations.
- work better with children with intellectual and developmental disabilities and their families to support healthy habits and use of appropriate community resources.
- Explain Promote participants' capacities to understand, through self-awareness & reflection, what matters to parents/families of children with Complex special health care needs when partnering with healthcare providers.
