

Pediatric Practical Pearls

Saturday, April 10, 2021
7:45 am to 12:00 pm

“What's New in Pediatric Surgery?”

<https://iu.cloud-cme.com/PearlsApril2021>

Course Description

Designed for pediatricians, family practice physicians and others providing primary healthcare to children. This course will review current scientific advances as they apply to daily practice. Participants will advance their diagnostic and therapeutic skills through this practical evidence-based review.

Course Objectives

At the conclusion of this course, participants should improve their knowledge in current diagnosis and treatment guidelines and should be able to:

- State the advantages of minimally invasive surgery over open surgery for certain pediatric conditions.
- Explain what two main factors guide treatment for scoliosis. (Hint: Degree of curvature and Level of skeletal maturity).
- Become reacquainted with normal gait and alignment in children, and to recognize when things are not progressing normally. We will review typical gait problems that come to primary care (intoeing, acute and chronic limps) and alignment problems (bow legs, knock knees etc.).
- Explain to others that the Umbilical hernias usually do not require surgical intervention before the age of 3-5 years of age. Therefore, referral for an uncomplicated (reducible) umbilical hernia is usually not necessary until 3 years of age.
- Discuss the indications for surgical repair in patients with pectus excavatum.

April 10, 2021 Agenda

7:30 am	Registration
7:45	Welcome to Pearls Jill V. Helphinstine, MD Assistant Professor of Clinical Pediatrics General and Community Pediatrics
8:00	Talk 1 "The Latest and Greatest in Pediatric Minimally Invasive General Surgery" Brian W. Gray, MD, FACS Assistant Professor of Pediatric Surgery Riley Hospital for Children at IU Health
8:40	Break – (10 minutes)
8:50	Talk 2 "Scoliosis: When to refer and how we can help" Tyler W. Christman, DO, MS Assistant Professor of Clinical Orthopaedic Surgery Riley Hospital for Children at IU Health
9:30	Break – (10 minutes)
9:40	Talk 3 "Gait Problems in Children: What will they grow out of, when to worry, and when to refer" Robert Bielski MD Associate Professor of Clinical Orthopaedic Surgery Riley Hospital for Children at IU Health
10:20	Break – (10 minutes)

Practical Pearls Workshop Series

Our April Theme: “What's New in Pediatric Surgery?”

Our Mission

- To keep primary care pediatricians updated on a wide variety of topics that impact their day-to-day care of children.
- To focus on important updates for PCPs and "things specialists wish primary care providers knew."
