Nephrology: Past, Present & Future

September 9, 2017; 11:00 to 3:30 pm
Walther auditorium, IU School of Medicine

A special CME course celebrating the past, present and future of patient care in celebration of the 50th anniversary of dialysis in the State of Indiana and the 50th anniversary of the IU Division of Nephrology. The speakers will review the major scientific and therapeutic advances in the past 50 years, discuss current therapies, and provide a glimpse of what the future may hold in innovative treatments.

Learning Objectives:
At the conclusion of this activity, participants should be able to:
- Determine the optimal management for anemia of CKD and CKD-MBD.
- Recognize the changes in organ allocation policy for kidney transplantation in USA.
- Discuss the role of microscopic imaging in research, drug discovery and therapeutic approaches to diseases.
- Identify the use of pharmacogenomics testing to inform clinical practice.
- Recall the role of population health in health delivery.

Program Agenda:
Moderators: Jawed Sher, MBBS, & Richard Hamburger, MD
11:00 a.m. Welcome
11:05-11:35 a.m. Michael Kraus, MD: Dialysis
11:35 a.m.-12:05 p.m. Tim Taber, MD: Transplantation
12:05-12:35 p.m. Bruce Molitoris, MD: Imaging modalities
BREAK for lunch (included in registration fee)
1:15-1:45 p.m. Jay Wish, MD: Anemia of Chronic Kidney Disease
1:45-2:15 p.m. Sharon Moe, MD: CKD-Mineral Bone Disorder
2:15-2:45 p.m. Michael Eadon, MD: Personalized Medicine
