# 2019-2020 Pediatric Practical Pearls

Saturday, January 25, 2020

7:45 am to 12:00 pm

## "What's New in Pediatric Primary Care?"

### Course Description

Designed for pediatricians, family practice physicians and others providing primary healthcare to children. This course will review current scientific advances as they apply to daily practice. Participants will advance their diagnostic and therapeutic skills through this practical evidence based review.

### Course Objectives

At the conclusion of this course, participants should improve their knowledge in current diagnosis and treatment guidelines and should be able to:

- Discuss new developments in the field of pediatric infectious diseases"
- Review and discuss changes in the septic work-up for febrile infants
- Discuss current guidelines for the diagnosis and treatment of common pediatric gastrointestinal conditions and apply them to practice
- Explain diabetes related technological advances
