2017-2018 Pediatric Practical Pearls Agenda

Saturday, April 14, 2018

7:45 am to 12:00 pm

Course Description

Designed for pediatricians, family practice physicians and others providing primary healthcare to children. This course will review current scientific advances as they apply to daily practice. Participants will advance their diagnostic and therapeutic skills through this highly practical evidence based review.

Course Objectives

At the conclusion of this course, participants will be able to:

- Know when genetic testing is indicated and what different tests can and cannot detect
 - Detect early signs of learning disabilities
 - Diagnose when and where to make appropriate referrals for speech therapy
 - Discuss newborn screening results and know when to refer
-
